

Never stop bioteching.

Anticipating and adapting at every step of development

Emerging biotech companies like yours are dedicated to bringing groundbreaking medical innovations to patients who need them. At Parexel Biotech, we work side-by-side with biotech companies to break down the development journey into a series of connected decisions, steps, and milestones - from regulatory and commercial strategy to cutting-edge trial design and execution.

Deep experience to bring you and your patients closer to better outcomes together.

- › Clinical development expertise and insights
- › Industry experts
- › Patient-focused development

Integrated services from us. Less effort for you.

Leveraging our dedicated biotech operations group, we match your unique requirements with an experienced team that anticipates and adaptively delivers the solutions you need.

Global execution, local expertise.

No matter where you're exploring, we can help you navigate competitive, regulatory, and reimbursement landscapes in all major markets, including China.

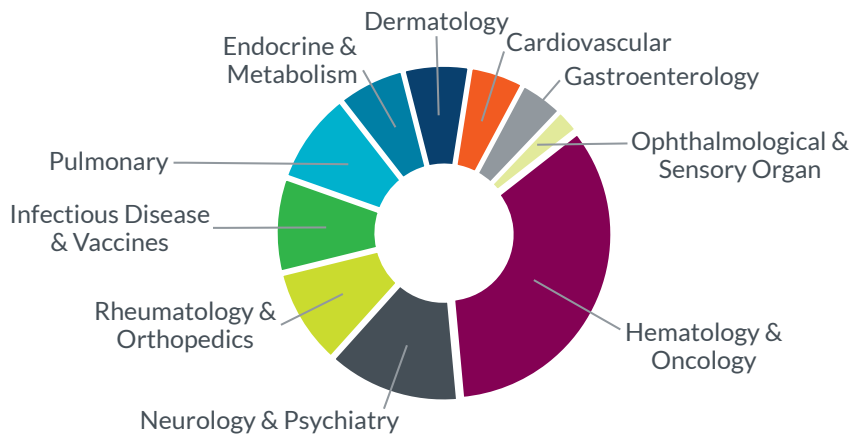

Over the past five years, Parexel's experience providing clinical trial services:

➤ **2,000+**
projects

➤ **96,000+**
sites

Our top 10 therapeutic areas:

Strategically applied patient insights and patient-centric innovation resulted in:

➤ **24%** **faster enrollment**
from first subject randomized to last subject randomized

➤ **25%** **faster treatment**
from last subject randomized to last subject complete

➤ **23%** **shorter cycle**
from final protocol available to database lock

...when compared with the industry average
