YPrime has more than 10 years of experience designing cloud-based technology solutions to meet the needs of today's complex challenges while innovating for tomorrow's clinical trials. From designers and developers to managers and support techs, our seasoned team works with one goal in mind: **Ensuring an optimal experience for sponsors, sites, and patients.** Our interactive response technology (IRT) and electronic clinical outcome assessment (eCOA) platforms, clinical supplies consulting, patient engagement, and decentralized clinical trial (DCT) solutions help expedite and improve the quality of patient management, supply chain management, drug accountability, and clinical data. Our scientific staff help clients focus on those endpoints and timepoints that answer the most important research questions and meet regulatory expectations. Our data science team optimizes the technology to drive better outcomes and deliver the highest quality data. Our data services and tools help sponsors bring together fragmented clinical research data into contextual information they can act on. YPrime's technology and service offerings enable sponsors to move faster and more efficiently to their next development milestone. **We're here to help you make a positive impact by bringing life-changing therapies to market.**
